

Researching a Disaster Through the Making of *Challenger: The Final Flight*

**VIRTUAL
EVENT**

Wednesday, April 7, 2021 | 7:00 - 8:30 P.M.

Zoom Event ID: 916 4121 4333

Also streaming live on Facebook @LeatherbyLibraries

Join librarians Doug Dechow, Ph.D., and Annie Tang, MLIS, as they moderate a discussion with a panel of researchers about the legacy of the 1986 space shuttle Challenger disaster and the behind-the-scenes research process involved in the production of the Netflix documentary series *Challenger: The Final Flight*. Researchers from the film project will share their exploratory journey for primary sources at libraries and archives (including our own Frank Mt. Pleasant Library of Special Collections & Archives) and their role in bringing this story to life through the archives. We will also be joined by a Mission Operations Engineer at the Jet Propulsion Laboratory who will speak on current robotic space explorations.

Stay for a special appearance by the documentary directors Daniel Junge and Steven Leckart during the Q&A.
