

INNOKENTIY V. MASLENNIKOV

Education:

1989 -	MOSCOW INSTITUTE OF PHYSICS AND TECHNOLOGY	MOSCOW, RUSSIA
1992	Ph.D. in Biophysics, 1993	
Thesis title: "Spatial structure of Bacteriorhodopsin transmembrane fragments"		
1981 -	MOSCOW STATE UNIVERSITY, FACULTY OF MECHANICS AND MATHEMATICS,	
1986	DEPARTMENT OF HYDRODYNAMICS	MOSCOW, RUSSIA
M.S. in Mathematics and Physics, 1986		
Thesis title: "Biomechanics of respiration and trachea"		

Experience:

2015 -	CHAPMAN UNIVERSITY, SCHOOL OF PHARMACY Research Assistant Professor	IRVINE, CALIFORNIA
	<ul style="list-style-type: none">• Structural and Imaging Core facility management and maintenance.• NMR spectroscopy support: data analysis and interpretation; chemical structure analysis and verification of synthetic and natural small molecule products; training new users, consultation and assistance in experiment setup and data analysis.• Tutoring, mentoring, and supervision of undergraduate and graduate students; hand-on training on various biophysical technique; development of the laboratory courses for students; mentoring of post-doctoral trainees.	
2010 -	JOINT CENTER FOR BIOSCIENCES	SONGDO, INCHEON, SOUTH KOREA
2015	Research Assistant Professor	
	<ul style="list-style-type: none">• Developed method for fast NMR assignment of proteins using combinatorial isotope labeling.• Characterized and analyzed rhamnolipid mixtures by solution NMR spectroscopy.	
2006 -	THE SALK INSTITUTE FOR BIOLOGICAL STUDIES	LA JOLLA, CALIFORNIA
2014	Research Associate (2006-2007), Staff Scientist (since 2007), Structural Biology Laboratory (Prof. Choe)	
	<ul style="list-style-type: none">• Developed method for fast structural analysis of membrane proteins by solution NMR.• Determined solution NMR structures of six human membrane proteins and of membrane domains of <i>E. coli</i> histidine kinase receptors.• Management of NMR facility: administration, maintenance, and troubleshooting of Bruker Avance-700 (with CryoProbe) and Varian NMR System 500 spectrometers.	
1986 -	RUSSIAN ACADEMY OF SCIENCES, SHEMYAKIN-OVCHINNIKOV INSTITUTE OF BIOORGANIC CHEMISTRY	MOSCOW, RUSSIA
2006	Research Assistant (1986-1989), Graduate Student (1989-1993), Senior Staff Researcher (1994-2006) Structural Biology Laboratory (Prof. Bystrov and Prof. Arseniev)	
	<ul style="list-style-type: none">• NMR support of synthetic chemistry laboratories: analyzed and verified/solved more than 2500 structures of synthetic and natural products (carbohydrates, peptides, lipids, steroids).• Solved more than 15 structures of globular and membrane proteins and their domains.• Developed approaches and designed programs for protein multiconformational analysis and for structure validation.• Design and monitoring of construction of new NMR facility for installation of 800 MHz, 700 MHz and two 600 MHz NMR spectrometers.	

Teaching and Supervision:

1991 - present	RUSSIAN ACADEMY OF SCIENCES and MOSCOW INSTITUTE OF PHYSICS AND TECHNOLOGY (MOSCOW, RUSSIA), SALK INSTITUTE FOR BIOLOGICAL STUDIES (LA JOLLA, CA), JOINT CENTER FOR BIOSCIENCES (INCHEON, SOUTH KOREA)
-----------------------	--

- Tutored and supervised undergraduate and graduate (14 M.S. and 7 Ph.D.) students
- Supervised and managed teams of postdoctoral researchers, research assistants, and technicians, conducting grant- and industry-funded research projects.

Skills:

- Solution NMR techniques: homonuclear (^1H , ^2H , ^{13}C , ^{19}F , ^{23}Na , ^{31}P), heteronuclear ($^1\text{H}/^{13}\text{C}/^{15}\text{N}/^{19}\text{F}$).
- Structural analysis of membrane and globular proteins by multidimensional solution NMR.
- Analysis, verification and determination of chemical structures for small organic molecules (including analysis in mixtures) by homonuclear and heteronuclear 1D and 2D-NMR.
- Molecular modeling, molecular interaction analysis; molecular graphics, visualization, and animation.
- Protein purification and characterization: chromatography (gel-filtration, affinity, reverse-phase; FPLC and HPLC systems), mass-spectroscopy (Seldi), analytical ultracentrifugation, light scattering and refracting index analysis, CD spectroscopy.
- Troubleshooting protein expression, purification, and sample preparation for NMR and X-ray studies: protein yield, isotope labeling for NMR, sample purity, stability, and general quality, protein oligomerization, protein solubilization by detergents, detergent or buffer exchange.
- Troubleshooting biologics production for pre-clinical studies: detection and removal of impurities, contaminations, and residual buffer components.
- Experience in automation programming, script writing, programming languages (C, Python).
- Management of NMR facilities: administration, maintenance, and troubleshooting of Bruker (WM-500, DRX-500, Avance-700 with CryoProbe) and Varian (Unity600, NMR System 500) spectrometers. Administration and maintenance of data processing workstations (SUN, Silicon Graphics, PC, Mac) with Unix, Linux, Windows, and Mac OS operation systems.
- Managing research collaboration with academic and industrial partners on structural studies of natural and recombinant proteins, chimeric proteins, peptides, and other natural and synthetic products. Supervision of teams and laboratory staff, managing budget, preparation and presentation of proposals and reports.

Patent:

Senyon Choe, Christian Klammt, Witek Kwiatkowski, Innokentiy Maslennikov. Methods and Compositions for NMR Spectroscopic Analysis Using Isotopic Labeling Schemes.
US Patent 20,130,078,727, 2013; WO Patent 2,011,109,832

Invited Presentations:

6. Approaches for facilitation of structural studies of membrane proteins by solution NMR spectroscopy: combinatorial labeling for resonance assignment and systematic spin-labeling for paramagnetic relaxation analysis.
International Workshop on Membrane protein structures by Cell-free synthesis, NMR analysis, and molecular dynamics. Academia Sinica, Taipei, Taiwan, 2013.
5. Membrane domain structures of three *E. coli* histidine kinase receptors by cell-free expression and rapid NMR analysis. XXIV-th International Conference on Magnetic Resonance in Biological Systems, Cairns, Australia, 2010.
4. Cell-free combinatorial dual labeling and accelerated assignment for structural studies of membrane proteins. Invited lecture at Korea Basic Science Institute, Ochang, South Korea, 2010.
3. Efficient approaches for membrane protein sample validation and characterization.
Annual NIH Protein Structure Initiative meeting Enabling Technologies, 2009, Bethesda, USA.
2. Solution NMR spectroscopy of Membrane and Membrane-active Proteins. Invited lecture at Korea Basic Science Institute, Ochang, South Korea, 2007.
1. Conformational variability and structural mimicry of snail and snake toxins, targeting nicotinic acetylcholine receptors.
XIII-th World Congress of the International Society on Toxinology, Paris, France, 2000.
