

We are Hiring!

Want to earn some extra cash and get late move out from your residence hall? Apply for the position [here!](#)

 CHAPMAN UNIVERSITY | Office of Sustainability

Apply to become a:

MOVE OUT ECO - REP

PAID POSITION WITH LATE MOVE OUT FROM RES HALLS OFFERED!

From Wednesday, May 17 through Saturday, May 20 you will:

-  **Manage donation stations during move-out week**
-  **Help divert as much waste as possible from the landfill**
-  **Ensure good quality clothing, furniture, and household items are collected for donation**

Interested? Email sustainability@chapman.edu with any questions

The Office of Sustainability is hiring Move Out Eco-Reps! In this role, you will help the Office of Sustainability achieve their goals of diverting as much waste as possible from the landfill, making the move-out process more eco-friendly. Job responsibilities include managing donation stations either on main campus (near the residence halls), Chapman Grand, or Panther Village by directing students and families as

they sort their donations into various streams: clothing, furniture, household items, electronic waste, etc.

This is an hourly paid position that requires minimal experience and only one training session required prior to move out. Work shifts will take place from Wednesday May 17th to Saturday May 20th, in increments of 4-hour shifts (8am-12pm, 12pm-4pm, 4pm-8pm). A minimum of 3 shifts are required for this position, and for Eco-Reps living in Chapman residence halls, an extension is given until Monday, May 22nd for move out.

Regalia Reuse

We're just a little over a month out from graduation! Early congratulations to all the graduating seniors and good luck with your last round of finals. This week, we distributed donated caps and gowns to graduates who reserved items through our Regalia Reuse program.

Did you know that more than 5 million gowns wind up in landfills every year? Interested in helping divert waste from the landfills? Consider donating your graduation regalia after graduation for the next class! There will be a drop box in the Rotunda at Leatherby Libraries following Commencement where you can leave items you wish to donate.

Res Life x Office of Sustainability Events

Thrifty Fest

Henley Hall is hosting an event to encourage sustainable living through their first Thrifty Fest! On **April 15 from 10am - 4pm**, come to the Sandhu Conference Center parking lot and participate in a clothing and goods exchange. Donate or exchange old clothes and items to get a head start on spring cleaning! Sign up for a time [here](#) to have your donations picked up prior to the event and earn digital tickets you can use to "buy" items at Thrifty Fest. There will also be social media challenges you can complete to earn digital tickets. Keep an eye out on our [Instagram](#) for these!

Article Picks

50 years of Earth Day: What's Better Today, and What's Worse?

Take a look at the evolution of Earth Day, with both the environmental victories and failures that have impacted American priorities towards ecological justice-- lots has changed. With the large push for the protection of endangered animals, many at-risk species have grown in numbers, such as the bald eagle. Yet still, deforestation and habitat

destruction caused by the oil, logging, farming, and mining industries has led to an estimated 60% decline in thousands of wildlife populations worldwide since 1970.

A Push to Turn Farm Waste Into Fuel

The recent Inflation Reduction Act includes multiple climate change provisions that have encouraged companies and developers to find more sustainable alternatives that will help lower carbon dioxide emissions. As a result, some developers have worked on ambitious projects that turn corn into ethanol and soybeans into biodiesel for transportation fuel.

EPA to Tighten Limits on Mercury and Other Pollutants from Power Plants

The EPA has proposed new policies to reduce the emissions of multiple hazardous air pollutants alongside moving away from coal- and oil-fired power plants. Mercury and other hazardous pollutants pose a risk to human health and the environment, thus pushing towards cleaner energy sources such as solar and wind.
