OVERVIEW

Chapman University engaged SSRS to conduct the 2023 wave of The Chapman University Survey on American Fears (CSAF). Chapman University initiated this nationwide poll on what strikes fear in Americans in 2014. The primary objective of this survey is to collect annual data on the fears, worries and concerns of Americans, the personal, behavioral and attitudinal characteristics related to those fears, and how those fears are associated with other attitudes and behaviors.

The CSAF is a project of the Earl Babbie Research Center in the Wilkinson College of Arts, Humanities, and Social Sciences at Chapman University. The Earl Babbie Research Center is dedicated to using a variety of social science research methods to examine critical social, behavioral, economic and environmental problems.

CSAF was conducted online via the SSRS Opinion Panel and invited adults age 18 and older to participate via the web. It included 1,014 participants and data collection was conducted from March 27 to April 4, 2023.

This report provides information about the sampling procedures and the methods used to collect, process, and weight data for the 2023 wave of the CSAF.

SSRS PROFILE

SSRS is a full-service survey and market research firm managed by a core of dedicated professionals with advanced degrees in the social sciences, who partner with clients interested in conducting high-quality research. SSRS designs and implements research solutions for complex strategic, tactical, public opinion, and policy issues in the U.S. and in more than 40 countries worldwide. The SSRS team specializes in creative problem-solving and informed analysis to meet its clients' research goals. SSRS provides the complete set of analytical, administrative and management capabilities needed for successful project execution. In the industry, SSRS is renowned for its sophisticated sample designs and its experience with all facets of data collection, including those involving multimodal formats. SSRS also has extensive statistical and analytical capabilities for extracting important insights from the survey data and suggesting strategies based on those insights.

SAMPLE DESIGN: THE SSRS OPINION PANEL

SSRS Opinion Panel members are recruited randomly based on nationally representative ABS (Address Based Sample) design (including Hawaii and Alaska). ABS respondents are randomly sampled by Marketing Systems Group (MSG) through the U.S. Postal Service's Computerized Delivery Sequence (CDS), a regularly-updated listing of all known addresses in the U.S. For the Opinion Panel, known business addresses are excluded from the sample frame.

For the CSAF, all panelists participated via web by self-administering the survey.¹ The Weighting section of this report details the non-Internet Adjustment applied to ensure weighted data are projectable to the full U.S. population.

QUESTIONNAIRE DESIGN

Chapman University provided the survey instrument to SSRS. SSRS reviewed the survey instrument and provided feedback. Together, SSRS and the Chapman University team worked to finalize the questionnaire.

Upon final approval, SSRS formatted and programmed the survey for completion online. Additional steps were employed to ensure a quality experience in survey administration regardless of the device utilized by respondents, whether a desktop computer, tablet, or mobile device. The survey program was optimized for administration via smartphone or other mobile handheld devices. The survey program was also checked on multiple devices, including desktop computers and handheld mobile devices, and different web browsers to ensure consistent and optimized visualization across devices and web browsers. The survey was accessed directly by respondents, using their unique survey links with embedded passwords. This also gave them the ability to return to their survey later if they chose to suspend their survey.

DATA COLLECTION

Survey Sampling

All sample members drawn for the CSAF were adult, English-language panelists. Sample drawn for the CSAF was stratified by age, gender, race and ethnicity, education, Census region, party identification, and preferred survey language to ensure adequate representation of each demographic group.

Survey Administration Procedures

Surveys conducted for the CSAF are self-administered web surveys. In appreciation for their participation, respondents from the SSRS Opinion Panel receive a modest incentive for participation (in the form of an electronic gift card). Depending on the field period, reminder emails are sent to panelists who do not complete the survey after being sent the initial invitation.

For the CSAF study, the survey administration schedule was as follows:

Touchpoint	Date
Soft launch invitation	3/27/2023
Full launch invitation	3/28/2023
Field Close	4/4/2023

¹ The SSRS Opinion Panel is a multi-mode panel. Internet households participate via web, while all non-Internet households (including those who have Internet but are unwilling to take surveys online) can participate via phone.

A “soft launch” inviting a limited number of panelists to participate was conducted on March 27th. Soft launch data was checked to ensure functionality of the program. After checking soft launch data to ensure that all questionnaire content and skip patterns were correct, additional sample was released to ensure the final sample met the study goals.

The median length² of the CSAF survey was 12 minutes.

Panelists were emailed an invitation to complete the CSAF survey online. The email for each respondent included a unique passcode-embedded link. In appreciation for their participation, panelists received post-paid compensation in the form of an electronic gift card, sent via email immediately after completion of the survey.

In total, 2,189 panelists were sent email invitations with their own unique link to the survey. Targeted reminders were implemented for non-responding sample in order to stay aligned with population demographics. Panelists who had opted to receive text messages from the SSRS Opinion Panel received text message reminders. The survey administration schedule was as follows:

Touchpoint	Date
Soft launch	3/27/2023
First Email Invitation	3/28/2023
First Email and Text Reminder	3/30/2023
Second Reminder	4/1/2023
Third Reminder	4/3/2023
Field Close	4/4/2023

As a standard practice for SSRS Opinion Panel surveys, quality checks were incorporated into the survey. For CSAF, these included questions aimed at ensuring attentiveness and sincerity of response: asking respondents to select a specific response when viewing a list of items (attentiveness measure) and asking respondents about experiences involving impossible or extremely unlikely contexts (sincerity measure). Additionally, the number of skipped questions, the length of interview, and the number of “straight-lined” questions per respondent were analyzed. Straight-lining refers to a respondent selecting the same answer option for all questions in a series. Surveys completed by respondents which failed any of these four quality-control checks (attentiveness/sincerity questions, high rate of non-response, short survey length, and the number of straight-lined series) were closely reviewed on a case-by-case basis. Respondents who failed the substantive data-review were not included in the final data set.

² The mean length of the survey was 14 minutes and the modal length was 10 minutes.

Respondents were allowed to skip any question they did not wish to answer; however, high rates of non-response can be correlated with poor data quality. Notably, 97% of respondents answered 100% of all survey questions, with no one completing less than 95% of the entire questionnaire.

N Sampled for Survey	N Completed Survey	Final N After Quality Control Removals ³
2,189	1,018	1,014

COMPLETION RATE/RESPONSE RATE

Web-panel response rates are a product of (1) response rates to the original invitation to participate as a panelist and (2) the response rates, among panelists, to the invitation to participate in the study. The table, below, details the completion and response rates for this study.

Touchpoint	
Invited to Participate/Total Sample	2,189
Completed	1,014 ⁴
Survey Completion Rate	46%
AAPOR RR3	2% ⁵

DATA PROCESSING AND INTEGRATION

SSRS implemented several quality assurance procedures in data file preparation and processing. In addition to extensive testing of the web survey prior to the launching data collection, random data were generated to ensure that skip patterns were working correctly. After the soft launch, survey data were carefully checked for accuracy, completeness, and non-response to specific questions so that any issues could be identified and resolved prior to the full launch.

The data file programmer implemented a “data cleaning” procedure in which web survey skip patterns were created in order to ensure that all questions had the appropriate numbers of cases. This procedure involved a check of raw data by a program that consisted of instructions derived from the skip patterns designated on the questionnaire. The program confirmed that data were consistent with the definitions of codes and ranges and matched the appropriate bases of all questions.

WEIGHTING

This study, using sample selected from the SSRS Opinion Panel, was weighted to provide nationally representative and projectable estimates of the U.S. adult population 18 years of age and older.

³ The N=4 cases were removed due failing at least one of the three quality-control measures that were embedded into the survey.

⁴ Excludes cases removed for quality-control reasons.

⁵ Product of the SSRS Opinion Panel recruitment rate(s) and the CSAF survey completion rate(s) across sample-sources.

The sample was weighted in stages. The first stage of the weighting was the application of a base weight to account for different probabilities of recruitment to the SSRS Opinion Panel. Next, a non-Internet propensity score adjustment was applied to model households with Internet access to be representative of all households – including non-Internet households that are excluded from an online panel. In the final stage of weighting, sample demographics were post-stratified to match population parameters.

Base Weight

The base weight was computed differently depending on whether the panelist was recruited from ABS or from the RDD sample.

The base weight for ABS recruits is the product of a sampling weight and a household size adjustment. The sampling weight corrects for the disproportionate ABS design by adjusting the distribution of sample across the ABS strata to match the distribution of the ABS frame across strata.

ABS recruits come from a variety of sample sources, some of which employ different stratification schemes. ABS base weights are computed based on one of two stratifications. One stratification is geo-demographic. The unit of the stratification is Census Block Group and the strata are based on region, incidence of African American residents and incidence of Hispanic residents. The second stratification includes substrata based on modeled party identification.

After applying the base weight for the ABS recruits, a household size adjustment corrects for the sampling of one adult in each sampled household.

The ABS base weight, BW_{ABS} , can be expressed as a function of the proportion of the ABS frame in stratum i , P_i , the proportion of the ABS sample that was pulled from stratum i , p_i and the number of adults in household j as follows.

$$BW_{ABS} = (P_i/p_i) \times AD_{ij}$$

The base weight for the RDD sample recruits is the original base weight computed at the time of the original telephone interview. This base weight accounts for selection probabilities associated with the overlapping dual-frame RDD sample design.

The RDD base weight, BW_{Omni} can be expressed as a function of the size of the landline and cell phone sample frames (F_{LL} and F_{CELL}), the size of the landline and cell phone samples (S_{LL} and S_{CELL}), and the number of adults in each household AD as follows.⁶

$$BW_{Omni} = \left((LL \times AD \times S_{LL}/F_{LL}) + (CP \times S_{CELL}/F_{CELL}) - (LL \times AD \times CP \times S_{LL} \times S_{CP}/(F_{LL} \times F_{CP})) \right)^{-1}$$

Where $LL = 1$ if the respondent has a landline phone and $LL = 0$ otherwise and $CP = 1$ if the respondent has a cell phone and $CP = 0$ otherwise.

⁶ Buskirk, T. D., & Best, J. (2012). Venn Diagrams, Probability 101 and Sampling Weights Computed for Dual Frame Telephone RDD Designs. *Journal of Statistics and Mathematics*, 15, 3696-3710.

The base weights were standardized by recruitment source to produce the standardized base weight (SBW).

$$SBW = \begin{cases} BW_{Omni} \times n_{Omni} / \sum_{i \in OMNI} BW_{Omni}, & \text{cases recruited from SSRS Omnibus} \\ BW_{ABS} \times n_{ABS} / \sum_{i \in ABS} BW_{ABS}, & \text{cases recruited from ABS sample} \end{cases}$$

Where n_{Omni} is the number of interviews conducted from RDD recruited sample and n_{ABS} is the number of interviews conducted from ABS recruited sample.

Non-Internet Adjustment

In addition to the base weight, a non-Internet Adjustment (NIA) was made to the sample. For this adjustment, SSRS applies a propensity score to model adults with Internet access to be representative of all adults (regardless of whether they have Internet access). Propensity scores are estimated by modeling panel response mode on a range of demographic, attitudinal, and behavioral covariates. The model is a CART (Classification and Regression Trees) decision tree built in SPSS by using its scoring wizard available with the decision tree license. Adjustments for each respondent are then calculated as the reciprocal of the estimated Internet access propensity found from the model.

Raking

The final stage of weighting balanced the demographic profile of the sample to population benchmark distributions.⁷

Weighting was accomplished using SPSSINC RAKE, an SPSS extension module that simultaneously balances the distributions of all variables using the GENLOG procedure⁸. The data were weighted to distributions of gender by age, gender by education, age by education, education, race/ethnicity, census region, population density, civic engagement, religion affiliation, Internet use frequency, political party identification, and voter registration.

The gender, age, education, race/ethnicity, and region benchmarks were derived from the 2022 Current Population Survey⁹ (CPS) data. The population density benchmark was derived from the 2021 Census Planning Database¹⁰. The civic engagement benchmark was derived from the September 2019 CPS Volunteering and Civic Life Supplement¹¹ data. The religious affiliation, Internet use frequency, and political party identification benchmarks were derived from Pew Research Center's 2022 National Public Opinion

⁷ To handle missing data among some of the self-reported demographic variables we employ a technique called hot decking. Hot deck imputation replaces the missing values of a respondent randomly with another similar respondent without missing data. These are further determined by variables predictive of non-response that are present in the entire file. We use an SPSS macro detailed in 'Goodbye, Listwise Deletion: Presenting Hot Deck Imputation as an Easy and Effective Tool for Handling Missing Data' (Myers, 2011).

⁹ <https://www.census.gov/programs-surveys/cps.html>

¹⁰ <https://www.census.gov/topics/research/guidance/planning-databases/2021.html>

¹¹ Civically engaged respondents are defined as those who have volunteered in the past 12 months or who talk to their neighbors daily. https://www.census.gov/data/datasets/time-series/demo/cps/cps-supp_cps-repwgt/cps-volunteer.html

Reference Survey¹². Lastly, the voter registration benchmark was derived from the 2022 Aristotle Voter Database¹³.

Weights were trimmed at the 2nd and 98th percentiles to prevent individual interviews from having too much influence on the final results.

Margin of Sampling Error

Specialized sampling designs and post-data collection statistical adjustments require analysis procedures that reflect departures from simple random sampling. SSRS calculates the effects of these design features so that an appropriate adjustment can be incorporated into tests of statistical significance when using these data. The so-called "design effect" or *deff* represents the loss in statistical efficiency that results from a disproportionate sample design and systematic non-response. SSRS calculates the composite design effect for a sample of size *n*, with each case having a weight, *w*, as:¹⁴

$$deff = \frac{n \sum w^2}{(\sum w)^2}$$

The total sample design effect for this survey is 1.47.

The survey's margin of error is the largest 95% confidence interval for any estimated proportion based on the total sample -- one around 50%. For example, the margin of error for the total sample is ±3.7 percentage points. This means that in 95 out of every 100 samples drawn using the same methodology, estimated proportions based on the entire sample will be no more than 3.7 percentage points away from their true values in the population. Margins of error for subgroups will be larger. It is important to remember that the sampling fluctuations captured in the margin of error are only one possible source of error in a survey estimate. Other sources, such as respondent selection bias, questionnaire wording, and reporting inaccuracy, may contribute additional error of greater or lesser magnitude.

DELIVERABLES

Final deliverables for this study were a weighted SPSS file, the final formatted questionnaire, and this methodology report.

For the final datafile, please note that when a respondent elected to skip a question they were coded as "1: Web blank." A codebook is provided below.

DATAFILE VARIABLES AND CODEBOOK

The following shows the name and description of each data variable and associated response categories provided in the SPSS file.

For all demographic data, aside from EDUCATION, EDUC, EMPLOY, and NEWINCOME, only sample-based data was used.

Variable Name	Variable Description
RESPID	RESPID. Respid
LENGTH	Length of survey (in minutes)
DEVICETYPE	Device used for survey completion
PHOMETYPE	Type of home
POWNHOME	Home ownership
PMSTATUS	Marital status
PEMPLOY	Employment status
PTOTPER	# of people in household
PADULTS	# of adults in household
PPARENT	Parent of child in household
PAGE1	Numeric age
PAGE2	Age for those refusing to give a number
PINCOME	Income
PINCOME4WAY	Income in four categories
PETH	Ethnicity
PPOLVIEW	Political ideology
PREGVOTE	Voter registration
PRELIGION	Religion
PRELIGION_997_OTHER	Religion for those who selected "Other"
PSTATE	State
PDMA	Designated Market Area from zip code
PDIVISION	Census Division from zip code
PMETRO	Metro status from zip code
PINTFREQ	Internet use frequency
PAGEFINAL	Recoded age (from pAge & pAge2)
PEDUCATION	Education
PGENDER	Gender
PPOLPARTY_2022	Party identification
PPOLLEAN_2022	Party lean
PRACE	Race

PREGION	Census Region
Q1	Q1. How religious do you consider yourself to be?
Q2	Q2. How often do you attend religious services at a church, mosque, synagogue, or other place of worship?
Q3	Q3. Which one statement comes closest to your personal beliefs about the Christian Bible?
Q4	Q4. How would you describe yourself politically?
Q5	Q5. Do you think of yourself as Republican, Democrat or Independent?
Q6	Q6. Who did you vote for in the 2020 Presidential election?
Q9a	Q9_a. How often do you... - Read a local newspaper from your hometown?
Q9b	Q9_b. How often do you... - Read a national newspaper such as USA Today, The Wall Street Journal, or The New York Times?
Q9c	Q9_c. How often do you... - Read online news websites?
Q9d	Q9_d. How often do you... - Watch the national nightly network news?
Q9e	Q9_e. How often do you... - Watch Fox News?
Q9f	Q9_f. How often do you... - Watch CNN?
Q9g	Q9_g. How often do you... - Watch MSNBC?
Q9h	Q9_h. How often do you... - Watch the local TV news?
Q9i	Q9_i. How often do you... - Watch daytime talk shows?
Q9j	Q9_j. How often do you... - Listen to a talk radio show that discusses politics?
Q9k	Q9_k. How often do you... - Get news from social media?
Q10a	Q10_a. How afraid are you of the following? - Becoming seriously ill
Q10b	Q10_b. How afraid are you of the following? - People I love becoming seriously ill
Q10c	Q10_c. How afraid are you of the following? - Dying
Q10d	Q10_d. How afraid are you of the following? - People I love dying
Q11a	Q11_a. How afraid are you of the following? - Air pollution
Q11b	Q11_b. How afraid are you of the following? - Pollution of drinking water
Q11c	Q11_c. How afraid are you of the following? - Pollution of oceans, rivers and lakes
Q11d	Q11_d. How afraid are you of the following? - Extinction of plant and animal species
Q11e	Q11_e. How afraid are you of the following? - Oil spills

Q11f	Q11_f. How afraid are you of the following? - Global warming and climate change
Q13a	Q13_a. How afraid are you of the following? - Not having enough money for the future
Q13b	Q13_b. How afraid are you of the following? - Not being able to pay off the college debt of myself or a family member
Q13c	Q13_c. How afraid are you of the following? - Not having enough money to pay my rent or mortgage
Q13d	Q13_d. How afraid are you of the following? - Being unemployed
Q13e	Q13_e. How afraid are you of the following? - High medical bills
Q13f	Q13_f. How afraid are you of the following? - Catching influenza (the seasonal flu)
Q13g	Q13_g. How afraid are you of the following? - Catching the coronavirus (COVID-19)
Q14a	Q14_a. How afraid are you of the following? - Computers replacing people in the workforce
Q14b	Q14_b. How afraid are you of the following? - Technology that I don't understand
Q14c	Q14_c. How afraid are you of the following? - Cyber-terrorism
Q14d	Q14_d. How afraid are you of the following? - Corporate tracking of personal data
Q14e	Q14_e. How afraid are you of the following? - Government tracking of personal data
Q15a	Q15_a. How afraid are you of the following events? - A devastating earthquake
Q15b	Q15_b. How afraid are you of the following events? - A devastating hurricane
Q15c	Q15_c. How afraid are you of the following events? - A devastating tornado
Q15d	Q15_d. How afraid are you of the following events? - A devastating flood
Q15e	Q15_e. How afraid are you of the following events? - A devastating blizzard/Winter storm
Q15f	Q15_f. How afraid are you of the following events? - A devastating drought
Q15g	Q15_g. How afraid are you of the following events? - A devastating wildfire

Q15h	Q15_h. How afraid are you of the following events? - A large volcanic eruption
Q15i	Q15_i. How afraid are you of the following events? - A new pandemic or a major epidemic
Q15j	Q15_j. How afraid are you of the following events? - Climate change impacting where I live
Q15k	Q15_k. How afraid are you of the following events? - A devastating natural disaster where I live
Q15Aa	Q15A_a. How afraid are you of the following events? - The collapse of the electrical grid
Q15Ab	Q15A_b. How afraid are you of the following events? - A nuclear accident/meltdown
Q15Ac	Q15A_c. How afraid are you of the following events? - Economic/financial collapse
Q15Ad	Q15A_d. How afraid are you of the following events? - Widespread civil unrest
Q15Ae	Q15A_e. How afraid are you of the following events? - The US becoming involved in another world war
Q15Af	Q15A_f. How afraid are you of the following events? - Whites no longer being the majority in the US
Q15Ag	Q15A_g. How afraid are you of the following events? - Illegal immigration
Q15Ah	Q15A_h. How afraid are you of the following events? - Violent overthrow of the U.S. government
Q15Ai	Q15A_i. How afraid are you of the following events? - Widespread voter fraud
Q15Ao	Q15A_o. How afraid are you of the following events? - The outcome of the next presidential election
Q15Aj	Q15A_j. How afraid are you of the following events? - Biological warfare
Q15Ak	Q15A_k. How afraid are you of the following events? - A terrorist attack
Q15Al	Q15A_l. How afraid are you of the following events? - North Korea using nuclear weapons
Q15Am	Q15A_m. How afraid are you of the following events? - Iran using nuclear weapons
Q15An	Q15A_n. How afraid are you of the following events? - Russia using nuclear weapons
Q16a	Q16_a. How afraid are you of the following? - Blood
Q16b	Q16_b. How afraid are you of the following? - Needles

Q16c	Q16_c. How afraid are you of the following? - Insects/arachnids (spiders, bees, etc.)
Q16d	Q16_d. How afraid are you of the following? - Reptiles (snakes, lizards, etc.)
Q16e	Q16_e. How afraid are you of the following? - Animals (dogs, rats, etc.)
Q16f	Q16_f. How afraid are you of the following? - Sharks
Q16g	Q16_g. How afraid are you of the following? - Germs
Q16h	Q16_h. How afraid are you of the following? - Deep lakes and oceans
Q16i	Q16_i. How afraid are you of the following? - Flying
Q16j	Q16_j. How afraid are you of the following? - Ghosts
Q16k	Q16_k. How afraid are you of the following? - Heights
Q16l	Q16_l. How afraid are you of the following? - Public speaking
Q16m	Q16_m. How afraid are you of the following? - Small, enclosed spaces
Q16n	Q16_n. How afraid are you of the following? - Strangers
Q16o	Q16_o. How afraid are you of the following? - Walking alone at night
Q17a	Q17_a. How afraid are you of being the victim of the following crimes? - Mugging
Q17b	Q17_b. How afraid are you of being the victim of the following crimes? - Stalking
Q17c	Q17_c. How afraid are you of being the victim of the following crimes? - Murder by a stranger
Q17d	Q17_d. How afraid are you of being the victim of the following crimes? - Murder by someone you know
Q17e	Q17_e. How afraid are you of being the victim of the following crimes? - Being hit by a drunk driver
Q17f	Q17_f. How afraid are you of being the victim of the following crimes? - Police brutality
Q17g	Q17_g. How afraid are you of being the victim of the following crimes? - Sexual assault by a stranger
Q17h	Q17_h. How afraid are you of being the victim of the following crimes? - Sexual assault by someone you know
Q17i	Q17_i. How afraid are you of being the victim of the following crimes? - Racial/hate crime
Q17j	Q17_j. How afraid are you of being the victim of the following crimes? - Random/mass shooting

Q17k	Q17_k. How afraid are you of being the victim of the following crimes? - Break-ins
Q17l	Q17_l. How afraid are you of being the victim of the following crimes? - Theft of property
Q17m	Q17_m. How afraid are you of being the victim of the following crimes? - Gang violence
Q17n	Q17_n. How afraid are you of being the victim of the following crimes? - Abduction/Kidnapping
Q17o	Q17_o. How afraid are you of being the victim of the following crimes? - Identity theft
Q17p	Q17_p. How afraid are you of being the victim of the following crimes? - Credit card fraud
Q17q	Q17_q. How afraid are you of being the victim of the following crimes? - Financial fraud (such as a Ponzi Scheme, embezzlement, etc.)
Q17r	Q17_r. How afraid are you of being the victim of the following crimes? - Terrorism
Q18a	Q18_a. How afraid are you of the following? - Antifa
Q18b	Q18_b. How afraid are you of the following? - White supremacists
Q18c	Q18_c. How afraid are you of the following? - Black Lives Matter (BLM)
Q18d	Q18_d. How afraid are you of the following? - The Proud Boys
Q18e	Q18_e. How afraid are you of the following? - Immigrants
Q18f	Q18_f. How afraid are you of the following? - Muslims
Q18g	Q18_g. How afraid are you of the following? - Right wing extremists
Q18h	Q18_h. How afraid are you of the following? - Left wing extremists
Q19a	Q19_a. How afraid are you of the following? - Government use of drones within the U.S.
Q19b	Q19_b. How afraid are you of the following? - Corrupt government officials
Q19c	Q19_c. How afraid are you of the following? - Government restrictions on firearms and ammunition
Q19d	Q19_d. How afraid are you of the following? - China's economy overtaking the US economy
Q19e	Q19_e. How afraid are you of the following? - China stealing US technology

Q19f	Q19_f. How afraid are you of the following? - China spying on the US
Q19g	Q19_g. How afraid are you of the following? - China's influence abroad reducing US power in the world
Q19h	Q19_h. How afraid are you of the following? - Military conflict between the United States and China
Q22a	Q22_a. Please indicate your level of agreement with the following statements - An emergency supply kit improves the chance of surviving a natural or manmade disaster.
Q22b	Q22_b. Please indicate your level of agreement with the following statements - I will experience a significant natural or manmade disaster in the near future.
Q22c	Q22_c. Please indicate your level of agreement with the following statements - I have not done enough to prepare for disasters.
Q22d	Q22_d. Please indicate your level of agreement with the following statements - I know how to prepare for disasters.
Q22e	Q22_e. Please indicate your level of agreement with the following statements - Natural disasters in my area are capable of seriously harming or damaging me or my property.
Q22h	Q22_h. Please indicate your level of agreement with the following statements - Over the past year, I have been impacted by natural disasters or extreme weather in my area.
Q22i	Q22_i. Please indicate your level of agreement with the following statements - Because of natural disasters or extreme weather I have experienced, I'm more concerned with disaster preparedness.
Q22j	Q22_j. Please indicate your level of agreement with the following statements - Because of climate change, I am more concerned with disaster preparedness
Q22k	Q22_k. Please indicate your level of agreement with the following statements - Climate change is causing more frequent and severe disasters such as hurricanes and wildfires
Q23	Q23. Do you have a disability or a health condition that might affect your ability to prepare for a disaster?
Q24	Q24. Does someone in your household have a disability or a health condition that might affect their ability to prepare for a disaster?

Q26	Q26. Do you have a disaster or emergency supply kit in your household, containing supplies such as food, water and medical supplies?
Q27a	Q27_a. Have you or anyone in your household... - Put together a plan for what you would do in a natural disaster or emergency such as a fire in your home?
Q27b	Q27_b. Have you or anyone in your household... - Put together a plan for what you would do with your pet(s) in a natural disaster or emergency such as a fire in your home?
Q27c	Q27_c. Have you or anyone in your household... - Backed up and/or stored personal, medical and financial records in a safe accessible place in case of a natural disaster or emergency such as a fire in your home?
Q28	Q28. Have you or anyone in your household signed up to receive emergency alerts and warnings?
Q29a	Q29_a. Please indicate your level of agreement with the following statements - The use of violence to achieve political goals is sometimes necessary.
Q29b	Q29_b. Please indicate your level of agreement with the following statements - Force is justified to restore Donald Trump to the Presidency.
