Teaching Focus

Health Care Delivery During Care Transitions, Long Term Care, Pharmacist Skills Lab, Medication Reconciliation, Pulmonology, Team Based Learning, Residency Preparation, Student Personal and Professional Development

Research Focus

My research and scholarship activities target strategies and interventions to support safe and effective transitions of care as patients move through the healthcare system. Areas of interest include identifying and evaluating practice models which optimize patient care and medication safety, creating resources and tools to support patients and healthcare providers, and developing student pharmacist personal and professional skills which support practice readiness.
